ABOUT ME

I have 5 years of experience in IT as a Software Tester and Quality Assurance Engineer and 3 years as PM. I have expertise in conducting and participating in different types of testing: Functional, Non-functional, GUI, Regression, Smoke and User Acceptance testing. Tested Windows-based desktop applications and web applications, also have small experience in testing mobile projects. As PM I am working on 3 project at the same time. My main achievement is full cycle of development: from project specification to project delivery. As a result of development - working and profitable products. ?
